How Supplied:

400-gram bottlesList No. 0551
2,000-gram bottlesList No. 0553

Indications:

For use as a dietary supplement for horses, as an aid in the prevention of biotin and methionine deficiencies.

Feeding Directions:

Convenient teaspoon measure included in each package. The usual amount per day is:

• Ponies:

7.5 milligrams biotin and 2.5 grams DL-methionine (1 slightly rounded teaspoonful).

• 1,100-pound (500-kg) horse:

15 milligrams biotin and 5 grams DL-methionine (2 slightly rounded teaspoonfuls).

Heavier horses:

30 milligrams biotin and 10 grams DL-methionine (4 slightly rounded teaspoonfuls).

One slightly rounded teaspoonful weighs approximately 3.5 grams and contains 7.5 milligrams biotin and 2.5 grams DL-methionine.

¹ Comben, N. Clarke, R.J. Sutherland, D.J.B. *Improving the Integrity of Hoof Horn in Equines by High Dietary Supplementation of Biotin*. Presented at the Annual Congress of the British Equine Veterinary Association, September 1983.

Administration:

Bio-Meth powder can be administered by mixing the daily amount in the concentrate or by top-dressing on grain, preferably rolled or ground. To facilitate proper adhesion to the ration, slightly moisten the grain with water or liquid supplement.

Guaranteed Analysis:

Per 2000g

D-Biotin0.22% 4,400 mg
DL-Methionine..... 72.3%..... 1,446,000 mg

Ingredients:

DL-methionine, D-biotin supplement, rice hulls and brown dye.

Hoof Health Maintenance:

Recent studies show that 15 mg of biotin fed daily dramatically improves hoof condition. Usually improvement in hoof horn strength is seen in 3 to 5 months, but biotin supplementation should be continued for 9 to 12 months or more if necessary. Permanent supplementation at a lower nutritional level of biotin may then be adopted to maintain healthy hooves.¹
