Dear Doctor:

We would like to invite you to participate in the Geri-Form Senior Care Clinical Trial Program.

Geri-Form is a specially formulated nutritional supplement designed to provide the nutrients required to improve the mental alertness and physical health of older dogs. Many clients have reported that their animal experienced an improvement in its "quality of life" with Geri-Form.

Geri-Form offers a practical dispensing solution to pet owners who complain about their animal exhibiting signs of old age, but without a specific disease.

Please complete the Geri-Form Senior Care Clinical Trial Veterinary Clinic Enrollment Form and send it to the address on the bottom of the form. We will send to your attention at no charge thirty-six (36) 50 count bottles of Geri-Form and an information packet.

The way the program works is you select 12 older dogs that are exhibiting signs of old age and enroll them in the Geri-Form Senior Care Clinical Trial Program. Fill out the top portion of the Geri-Form Clinical Trial Form and give the client the form and a bottle of Geri-Form. Let the client dose the animal for 50 days; then the client will fill out the remainder of the form and return it to you. The animal will most likely show signs of improvement, and the client will want to purchase additional Geri-Form. Changes in animal behavior and appearance are usually not observed until the third week of Geri-Form administration.

Send the completed form to LLOYD, Inc. at the address at the bottom of the form.

If you need additional forms or information on Geri-Form, please visit our website at www.lloydinc.com, click on the Vet-A-Mix division of LLOYD, Inc. and go to the Geri-Form page.

If you have any questions or comments, please call (800) 831-0004 or e-mail Steve Hoefing at shoefing@lloydinc.com.

Sincerely,

LLOYD, Inc.
