

Tanni-Gel

Astringent Gel

Indications: For use as an aid in the management of moist dermatitis and to toughen the foot pads of dogs. Tanni-Gel can be used as an astringent and drying agent for weeping wounds in large animals.

Advantages:

- Rapidly drying greaseless light gel that adheres to the affected areas
- Benzocaine, a topical anesthetic to reduce pain
- Tannic acid, a potent astringent to dry up wounds
- Salicylic acid, a keratolytic and bacteriostatic agent
- Isopropyl alcohol, a drying agent

Ingredients:

Isopropyl alcohol.....	70% v/v
Salicylic acid.....	4% w/v
Tannic acid.....	4% w/v
Benzocaine.....	1% w/v

Directions: Apply directly to skin lesion every 6-8 hours according to directions of a veterinarian or until the lesion is dry. Continue one application daily until healing is complete. Apply undiluted to foot pads and between the toes. If condition worsens or clinical signs persist for more than 7 days, discontinue use and consult a veterinarian.

KEEP OUT OF REACH OF CHILDREN

Note:

The benzocaine in Tanni-Gel minimizes the stinging sensation when applied to sensitive skin.

Warning:

For external use only. Avoid getting into eyes or on mucous membranes.
